

Santa Cruz Longboard Union

* INDICATOR *
DECEMBER 2011

Merry Christmas to all!

* Message from The President *

Looking forward to seeing everyone on Wednesday. This is pretty awesome for our entire club to be able to tour the oceanography facility in Santa Cruz. Remember it is pot luck so please bring something to eat & share if you can. Hope everyone has been getting some of this west swell. I was too far east to catch it this past week (Arizona). Hope everyone had a great Thanksgiving. I can't believe it is almost Christmas! We are going to be going to the surf meet in Doheny in January so I will be trying to recruit as many people as I can.

Mahalo, Scotty

* THE DINOSAUR DEN *

Question of the month by Kim Stoner

I hope you all had a nice Thanksgiving!

Here is my December 2011 Dino Den
KIM

What is the year of this 1st price list for Johnny Rice surfboards?

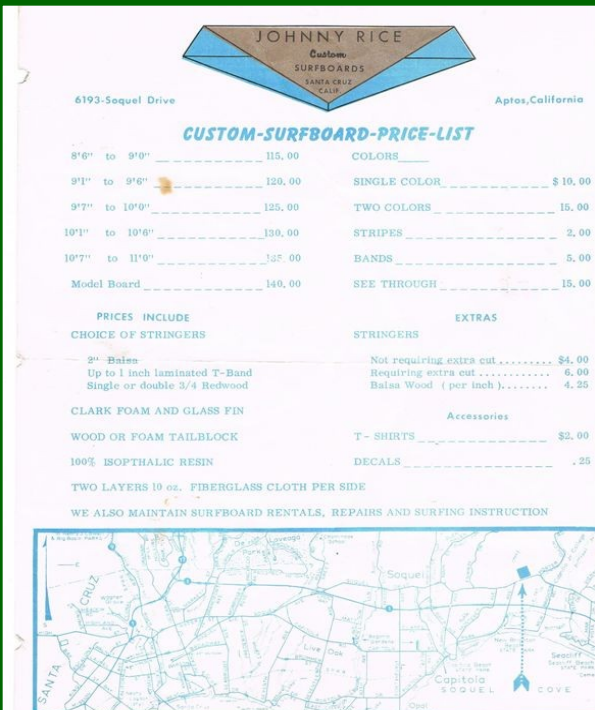

Where was his shop located at this time?

1) Who is this club member and he knows his numbers?

WAYLON OLSON

2) Where is he surfing & what is the approximate year of this photo?

PLEASURE POINT 1997

Meeting News

- We inducted 3 new members: Rachel Graham, Steve Davenport, and Mark Frisse! Congratulations and welcome into the SCLU Family!
- We are still working out details for our Bowling Night - I will send out an announcement this coming week.
- Our next meeting (Dec 7th) will be held at the Long's Marine Lab - please be sure not to miss this opportunity! We will have a couple of guest speakers and have a potluck style meeting.
- Dec 10th we will have our first contest meeting - focus being on obtaining sponsors for our Memorial Day contest in May. Time & Place = TBA
- Cindy Sandberg got 2nd Place and Paul Futch got 4th Place at the Senior Olympics that was held down in Oceanside!
- Scotty and Matt took a road trip down to Southern California to represent the SCLU in the Coalition of Surfing Clubs meeting... they had a great time! See Scotty or Matt for details if you would like to know how the meeting went.
- I gave out Election Ballots last night... I will begin mailing them this weekend, so please look in your mailbox this week. They have the SCLU address on the back, so just tri-fold it, stick a stamp and mail - or if you see Waylon, you can hand it to him. If you have not sent me your address, and you have paid dues and want to vote, please do so ASAP. The **ballots are due no later than Nov. 30th 2011.**

Good to see everyone last night!

Leigh

DATE: Wed. December 7, 2011

TIME: 6pm social, 7pm meeting

LOCATION: Longs Marine Lab

LABORATORY MAP IS ON THE NEXT PAGE
POTLUCK SO PLEASE BRING A DISH TO SHARE!

The website is being updated frequently, so check it out!

THANK YOU LEIGH!!!

Long Marine Laboratory

Long Marine Laboratory (LML) is an oceanside research facility located on a coastal site overlooking Monterey Bay National Marine Sanctuary. The lab provides facilities for scientists who require running seawater, large marine mammal pools, and seawater labs to conduct their research. The close proximity of the lab permits ease of integration of activities with the campus' instructional and research activities.

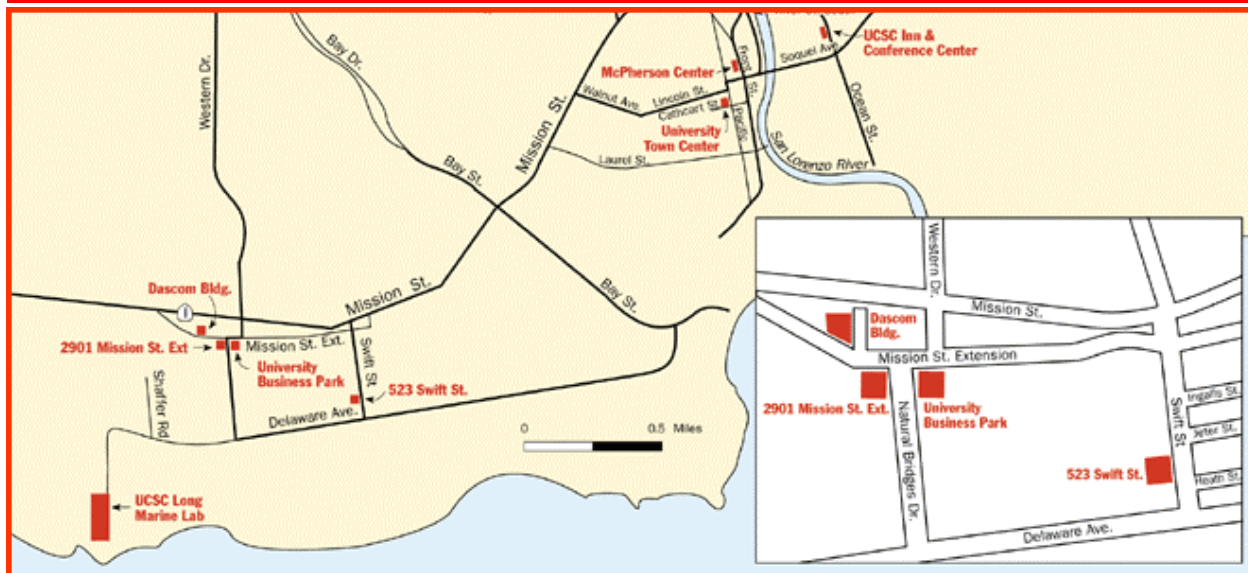

Aerial of Long Marine Lab (Lezin)

Approximately 100 UC Santa Cruz faculty, researchers, graduate students, and support staff have permanent space here. In addition, a number of undergraduate and graduate-level courses are taught onsite, and several visiting scientists are accommodated each year.

Long Marine Laboratory is known throughout the marine research community for innovative marine mammal research in areas such as diving physiology, physiological ecology, bioacoustics, and cognition. Active research at the lab is also conducted in the areas of nearshore invertebrate marine biology, ecology, and issues surrounding ocean health. Available facilities includes:

- Outdoor seawater pools and pens for holding pinnipeds, sea otters, and small cetaceans
- Seawater laboratories for fish, plankton, and marine invertebrates
- Radioisotope labs
- Culture lab for fish and marine invertebrate larvae and juveniles
- Controlled photoperiod labs
- Plankton culture labs
- Research scuba-diving facility and small boat staging area
- Meteorological station
- Remote sensing surface current station (CODAR) in cooperation with NOAA
- 1,000-gallon-per-minute seawater delivery system, wet and dry labs, and staff support

Also apart of the Long Marine Laboratory is the Seymour Marine Discovery Center, the lab's public education facility that focuses on interpreting marine research.
